

**AMENDMENTS TO THE CLAIMS:**

1. (Currently Amended) A process for mounting a plurality of parts to a cable comprising:

mounting the plurality of parts to the cable, the cable being a single unbroken member, in mounted positions and mounted attitudes, the mounted positions being intermediate between opposite longitudinal ends of the cable in a state where the cable is used, the mounted positions and the mounted attitudes being determined respectively for the parts, and

marking the cable with information for the mounting of each of the parts before the mounting of the parts ~~wherein the cable comprises a single unbroken member~~.

2. (Previously Presented) A process for mounting parts to a cable according to claim 1, wherein the step of marking the cable with information for mounting each of the parts comprises marking the cable with a name, the mounted position and the mounted attitude of each of the parts.

3. (Previously Presented) A process for mounting parts to a cable according to claim 1 or 2, wherein the step of marking is carried out at a step of cutting the cable into a predetermined length.

4. (Previously Presented) A process for mounting a plurality of parts to a cable according to claim 1, wherein the step of mounting comprises sliding at least one of the plurality of parts onto the cable.

5. (Previously Presented) A process for mounting a plurality of parts to a cable according to claim 1, wherein the plurality of parts are fixed to the cable at mounted positions by an adhesive.
